

## Honored Heroes

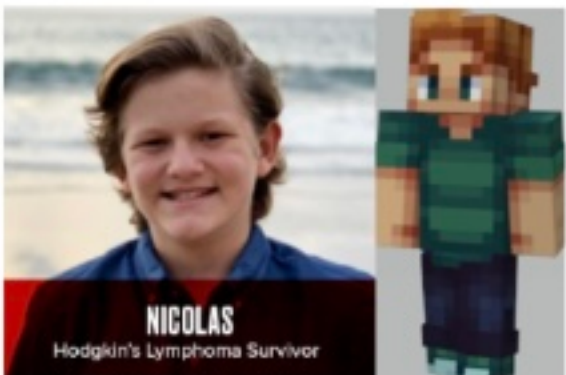

Meet our Honored Heroes and their Minecraft NPCs (Non-Player Characters)!

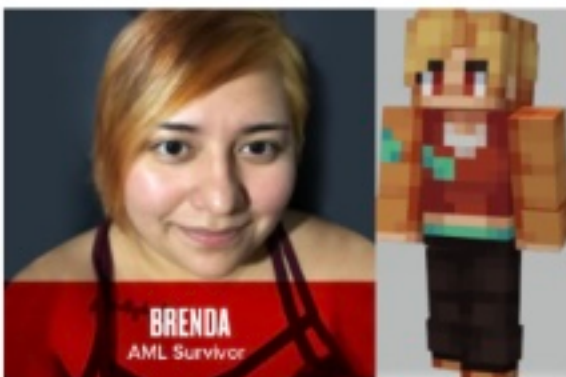

Lincoln is an energetic second-grader who loves playing sports, swimming, playing video games, and listening to music. Lincoln was diagnosed with Acute Bilineage Leukemia in November of 2017, meaning he had two types of Leukemia, which is rare. Lincoln had been through numerous hurdles in his journey to remission and rang the bell earlier this year. He is very grateful to be six months off treatment and feeling great!

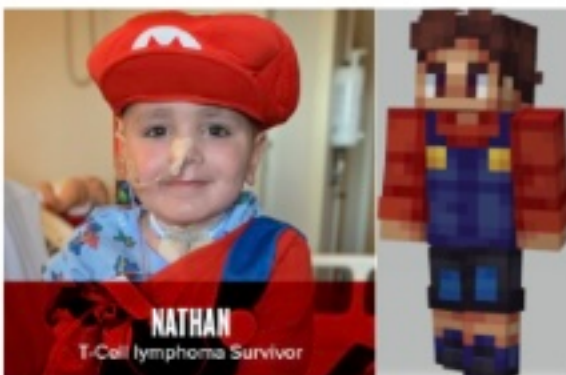

Jaiden is a high school freshman from Mansfield, OH. He was diagnosed with T-Cell Acute Lymphoblastic Leukemia in 2018 and is now in monthly maintenance treatment to ensure he stays healthy! He loves playing basketball and learning about health in school.

Nicolas was diagnosed with Hodgkin's Lymphoma almost four years ago when he was just 10 years old. He loves reading, baseball, football and playing Xbox. Nic loves spending time with his family and can typically be found in the center of the room, entertaining his loved ones and bringing joy to all. He recently celebrated three years in remission, started high school this year, and is currently on the JV football team.

Brenda is a 26-year-old AML survivor and Twitch streamer. She has been in remission for three years now but spent a lot of time indoors during her treatment, which is when she discovered her love for video games. Now, Brenda uses her platform to host charity streams for LLS, especially during Blood Cancer Awareness Month in September. Brenda's goal is to create a place where everyone would be included and treated fairly.

Nathan is T-cell lymphoma (TCL) survivor who just rang the "end of treatment bell" a couple of months ago. Nathan's family started a foundation called Super Herber Bros. Nathan and his brothers are ALL ABOUT VIDEO GAMES. Each of the boys have a medical condition & video games have been a godsend during their treatment. In fact, the main way they raise funds for their foundation is through a MarioKart tournament held in Rochester, Minnesota.

Toben (9) was diagnosed with Leukemia when he was just four years old and is now close to making his 2 year mark of cancer free! He is a fourth grader obsessed with Minecraft, Fortnite and Star Wars! This kid will do any chore you ask if the reward is to play on his Playstation or Nintendo switch! He can dress head to foot in Minecraft or Star Wars gear but for bedtime he prefers his oversized LLS survivor shirt.
